

Anglia Labels
Celebrating
40 years of excellence
1980-2020

Anglia Labels adds to its' **DIGITAL** armoury

HP Indigo WS6800 Digital Press

Anglia Labels has installed a HP WS6800 digital press, replacing its' existing HP WS4500.

This latest investment enhances the companies digital capabilities, with its main focus being on high quality short to medium run lengths across multiple variants.

The new press will allow Anglia Labels to improve lead times and diversify into new markets.

As Anglia Labels celebrates its 40th year in business, the HP press will consolidate its position as one of the market leaders in digital print, with over twenty years of digital label printing experience.

The latest press compliments last years acquisitions of a Domino N610i press and two DACO finishing units.
